Great... Now everyone's gonna know!

Heat detection is a vital part of a successful breeding program. With the Kamar® Heatmount® Detector your cows will give you a clear signal that they are ready to be bred.

The Kamar brand has long been the proven leader in heat detection, giving an accurate, reliable signal. The triggered red detector is easy to spot, and easy to understand.

What's the difference? The unique timing device inside will only activate the detector after a three-second mount. No accidental bumps. No hard-to-interpret smears or scratches. It gives a clear signal. And it stays on securely.

Talk to your A.I. rep or call for more information on the industry's leading heat detector.

Kamar® Heatmount® Detectors
