

# New Holland PAVILLION

*Progress*

July 7 - The Pavilions have really taken shape!

Left: The front of Pavilion 1 really stands out with this green exterior drywall.

Below: The roof on Pavilion 2 is complete. Looks pretty dark inside with lights yet to be installed.

Left: They have begun enclosing Pavilion 2.

*Progress*

---

July 18 - A few staff members got to take a tour of the Pavilions inside the construction area.

Right: Getting ready to pour the cement in the milk house.

Below: A nearly finished wash rack with grooved concrete and metal drain covers.

Right: Outlets are located on each column. Each box has its own breaker.

*Progress*

July 18 - Many areas are nearly complete.

Left: Completed manure bunker.

Below: PVC buried underground as far as the eye can see.

Left: The view from the second story on the front of Pavilion 1. Prettier than ever!

*Progress*

July 24 - Ventilation in Pavilion 2 is making strong progress.

Right: Intake fans are all installed in Pavilion 2. They are large enough to hold a golf cart.

Below: The duct diffusers are five feet in diameter and narrow to three feet.

Right: The view is from inside the plenum looking out the duct diffuser, looking over the back of Pavilion 2.
