

New Holland PAVILLION

Progress

June 4 - World Dairy Expo Building Committee and staff were able to tour inside the construction project.

Left: Mark Clarke, AEC General Manager, shows George and Debbie Crave the construction progress.

Below: Those in attendance were able to sign one of the many beams.

Left: Inside what will be the prefunction space at the front of Pavilion 1.

New Holland PAVILLION

Progress

June 4 - Over the course of two hours, numerous aspects of the the Pavilions were shown.

Left and Below: The outside entrance into the milking parlor and what will become the finished parlor space.

Right: There are 54 intake fans being installed for the state-of-the-art ventilation system.

New Holland PAVILLION

Progress

June 10 - Most of the outside of Pavilion 2, including the roof, is nearly completed. The front of Pavilion 1 prepares for concrete to be poured.

Right and Below: The roof is nearly complete on Pavilion 2.

Right: The front of Pavilion 1 will feature two stories of pre-function space.

New Holland

PAVILLION

Progress

June 12 - More materials are being hauled in and preparation for pouring concrete continues.

Left: The north side of Pavilion 1. These are the manure bunkers and wash bays.

Below: Leveling the Pavilion floor in anticipation of pouring concrete.

Left: Building materials continue to be hauled in by semis.

New Holland PAVILLION

Progress

June 20 - Concrete pouring begins! Today is the first of 18 pours for the Pavilion floors. There were 45 cement trucks lined up holding 1,518,750 pounds of concrete.

Right: Pouring has begun with the 200,000 square foot floor of Pavilion 2.

Below: Interior construction has begun.

New Holland PAVILLION

Progress

June 26 - Another inside view of the floors being poured.
